

From idea to *execution* powered by data.

ElevAlte Analytics builds the dashboards, AI systems, and data infrastructure that turn your raw information into decisions that move your business forward. Enterprise quality. Accessible pricing.

25%+ Reporting Efficiency Gain	3x Faster Leadership Decisions	-hrs Manual Reporting Eliminated	6+ Industries Served
--	--	--	--------------------------------

- Power BI Dashboards
- AI Enablement
- Market Research
- Project Controls
- Workflow Automation
- Bespoke Data Systems

Most businesses are drowning in data they can't *use*.

The tools exist. The data exists. What's missing is the structure, the systems, and the right partner to turn raw information into decisions that actually drive growth.

01 No single source of truth

KPIs scattered across disconnected spreadsheets. Leadership makes high-stakes decisions without real visibility.

02 Hours lost to manual reporting

Teams spend days building reports that should take minutes — slowing the organisation and introducing costly errors.

03 AI feels inaccessible

Generic tools don't fit real workflows. Enterprise consultancies charge fees only corporates can justify.

04 Growth stalls without insight

New ventures launch blind. Established businesses can't see what's working, what's draining margin, or where opportunity sits.

A consultancy built for *ambitious* businesses.

ElevAlte Analytics is a London-based data, AI, and business solutions consultancy. We build the dashboards, reporting systems, AI tools, and data infrastructure that organisations need to operate with clarity and confidence.

We exist because the best analytical work has always been locked behind fees only the largest organisations can afford. We changed that.

01 Premium quality, honestly priced

Enterprise-level dashboards and AI built to the highest standard — at prices designed for growing businesses.

02 Bespoke, never templated

Every solution is architected around your specific data, team, industry, and goals. We start from your reality.

03 We stay with you

Ongoing optimisation, support, and continuous improvement are central to how we work with every client.

Five capabilities. *One partner.*

Everything your organisation needs to operate on better data — in a single, focused consultancy that knows your industry and delivers with precision.

01 – Dashboards

Dashboards & Reporting

Board-ready Power BI dashboards, KPI frameworks, and management packs. Real-time visibility for leadership, built around how your organisation actually makes decisions. Includes POS integration, automated refreshes, and executive summary views.

02 – Intelligence

AI Enablement

Practical AI embedded into your workflows, research, and reporting. Not theoretical — delivered in ways that reduce effort, accelerate output, and sharpen every decision. Includes AI chatbots, automated research tools, and intelligent reporting systems.

03 – Research

Market Research & Insight

Survey analysis, feasibility studies, competitor mapping, and commercial insight structured for decisions. Know your market before you commit capital. AI-powered viability modelling and scenario analysis included for new business launches.

04 – Control

Project Controls

Cost, schedule, risk, and progress reporting for project and construction environments. PMO-style dashboards that give leadership real visibility, not approximations. Integrates with existing project management tools and financial systems.

05 – Automation

Automation & Digital Growth

Social media automation, AI customer chatbots, online sales workflows, and cross-platform publishing. Systems that run independently and scale without adding headcount. Covers Instagram, Facebook, X, and custom digital channels.

Bespoke

Custom Engagements

For organisations with challenges that don't fit a standard category. We build custom data systems, AI applications, and business intelligence infrastructure from first principles. No problem is too specific or too complex.

FOR NEW BUSINESSES

Launch with *evidence*, not instinct.

We give founders and new ventures the analytical foundation to validate, launch, and grow with confidence — knowing the market, the competition, and the numbers before they commit capital.

Market Research & Validation

Deep analysis to validate demand before capital is committed.

Business Viability Assessment

Financial modelling and scenario analysis for confident launch decisions.

AI Scenario Modelling

AI probability analysis to identify the highest-confidence path forward.

Competitor Analysis

Structured competitive mapping — know who you're up against, and how to win.

FOR EXISTING BUSINESSES

See your business *as it really is*.

Already operational? We build the dashboards, reporting systems, and analytical infrastructure that give you real visibility into performance — in real time, across every part of your organisation.

Business Performance Analysis

Full diagnostic of revenue, margins, efficiency, and team performance.

Process Optimisation

We identify the inefficiencies costing you time and money — and fix them.

Custom Power BI Dashboards

Live, board-ready KPI visibility across your entire operation, on demand.

Month-End Reporting

Automated monthly packs — clean, consistent, board-ready every time.

HOW IT WORKS

Four steps. From zero to *clarity*.

01

Discover

We get under the hood. Goals, current systems, data landscape, team structure, and where the biggest opportunities sit. No assumptions.

02

Design

We architect a bespoke solution. A real, scoped plan with clear deliverables — shaped around your specific context, not a generic framework.

03

Build

We deliver. Dashboards, AI systems, automations — built clean, functional, and precisely to specification. On time, every time.

04

Refine & Support

We don't disappear. We optimise, improve adoption, and ensure every solution continues delivering real value long after delivery.

Better systems change how businesses *decide.*

<p>25%+</p> <p>Reporting Efficiency</p> <p>Improvement in reporting efficiency after implementing structured dashboards and automated workflows.</p>	<p>3x</p> <p>Faster Decisions</p> <p>Leadership teams make strategic decisions three times faster with live KPI visibility and executive dashboards.</p>	<p>-hrs</p> <p>Manual Work Eliminated</p> <p>Hours saved every month by replacing fragmented spreadsheets with automated, connected reporting pipelines.</p>	<p>↑</p> <p>ROI</p> <p>Commercial Insight</p> <p>Sharper visibility into profitability and costs — directly impacting the bottom line for every client we work with.</p>

CASE STUDIES

Real scenarios. *Real outcomes.*

HOSPITALITY GROUP

Live profit visibility across 6 restaurant locations

THE CHALLENGE

Manual end-of-month reports across 6 locations. No real-time trading visibility. Leadership spending 3 days per month building packs with no confidence in data accuracy.

THE OUTCOME

Power BI dashboard with POS integration. Live revenue, labour, and margin daily. Monthly reporting reduced from 3 days to under 2 hours.

NEW BUSINESS LAUNCH

Market validation for a high-stakes service business launch

THE CHALLENGE

A founder ready to invest savings into a new service business. No data on market size, competitive landscape, or demand signals before committing capital.

THE OUTCOME

Full market research, competitor analysis, and AI viability modelling in 2 weeks. Business launched with an evidence-backed strategy and secured first 3 clients within 6 weeks.

SME SERVICE FIRM

Automated client reporting for a growing consultancy

THE CHALLENGE

Manually preparing bespoke client reports each month. Process took 2 full days, was inconsistent, error-prone, and consumed a senior team member's capacity every cycle.

THE OUTCOME

Automated workflow built end-to-end. Client packs generated in under 20 minutes. Zero manual entry. Senior team member reallocated to billable work — immediate ROI.

Two ways to work *with us.*

Recommended

Subscription

Ongoing Partnership · Monthly Retainer

- Dedicated ongoing support and continuous improvement of all systems
- Monthly reporting, dashboard maintenance, and performance updates
- Priority access to new AI and automation capabilities as they develop
- Regular strategy reviews, data health checks, and business intelligence sessions
- Flexible scope — scale up or down as your business changes

Project-Based

One-Off Project

Fixed Scope · Transparent Pricing · Single Engagement

- Clearly scoped deliverable with a defined, unambiguous outcome
- Fixed timeline and fully transparent pricing agreed upfront
- Ideal for dashboard builds, research projects, audits, and system setup
- Full handover with documentation, training, and knowledge transfer
- Optional transition to subscription model post-delivery

WHY ELEVAITE

01

Bespoke, never templated

Every solution built around your specific data, workflows, and business context.

02

Honest, accessible pricing

Enterprise-quality work without the enterprise price tag. No opaque retainer structures.

03

Real expertise, not theory

Built systems for hospitality, construction, property, and professional services.

04

We stay with you

Ongoing support is central — we optimise and improve over time, not just on delivery.

05

Fast, structured delivery

Clear milestones, defined deliverables, consistent progress — no surprises.

06

Practical AI. Not hype.

We embed AI where it genuinely helps — and tell you directly when it won't add value.

Let's make your data *work.*

One free conversation is all it takes. We'll review your current setup, identify your biggest opportunities, and show you exactly what better systems could look like for your business. No hard sell — just genuine value.
